

DOE/EIA-0218(82/40)

Weekly Coal Production

Production for Week Ended:
October 2, 1982

Released for Printing:
October 8, 1982

Highlights

Production of bituminous coal and lignite in the week ended October 2, 1982, as estimated by the Energy Information Administration, was 16,267,000 short tons. This was an increase of 4,975,000 short tons, or 44.1 percent from production in the previous week. Production in the corresponding week of 1981 was 19,025,000 short tons. Bituminous coal and lignite production from January 1 through October 2, 1982 totaled 625,442,000 short tons, up 6.3 percent from production in 1981.

Production of Pennsylvania anthracite in the week ended October 2, 1982, as estimated by the Energy Information Administration, was 123,000 short tons, an increase of 13,000 short tons or 17.1 percent from production in the previous week. Production in the corresponding week of 1981 was 95,000 short tons. Anthracite production from January 1 through October 2, 1982 totaled 4,685,000 short tons, up 14.2 percent from production in 1981.

Energy Information Administration Weekly Coal Production

Weekly Coal Production provides timely information on coal: current statistics on the production of anthracite, bituminous coal, and lignite are provided each week; monthly, quarterly, and annual statistics on coal consumption, production, stocks, imports and exports, and related supply and demand data are provided as they become available.

Weekly Coal Production is intended for use by the coal industry, the press, State and Federal Governments, policy makers, consumers, and analysts. Weekly coal production estimates are based on current trends in weekly rail carloadings of coal and current coal production trends as reported in *Coal Distribution* (Form EIA-6), monthly and quarterly coal production reports from State mine agencies, and *Coal Production Annual* (Form EIA-7a).

This publication is available on an annual subscription basis from the Superintendent of Documents, U.S. Government Printing Office.
